RE: Windward Condominium Dune Restoration Plan

Dear Michael,

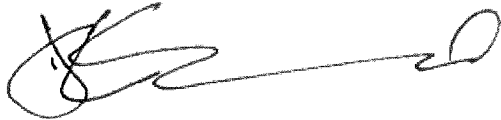

I have had the chance to consider Mike Morgan's submitted replanting/dune stabilization proposal for the Windward Condominiums, and I find the proposal to be generally acceptable. However, I would like the opportunity to meet with Mike at the site prior to implementation, to determine the most appropriate location(s) from which existing beach grass can be harvested as stock for the replanting effort. We can have that meeting and discussion at the time the project is initiated, so there is no need to make the determination at this time. Once a schedule for the overall restoration project has been set, we can confirm a time date for that meeting and determination in the field.

Because I have previously accepted Tom Horning's dune repair plan dated November 13, 2019, and considering my comments above, I can authorize the dune restoration work to begin. This authorization is subject to the following conditions:

- 1) Use of motorized equipment will require the contractor to first obtain a "Drive on Beach Permit". I have enclosed an application form for the permit, which you can forward to your contractor. Once completed and signed, it should be returned to me for approval, which typically takes 2-3 business days to process.
- 2) As indicated above, prior to implementation you will need to contact me to arrange a meeting at the site, so that we can determine the most appropriate beach grass harvest location(s). The meeting should also include the contractor who will be moving the sand so that all parties have a common understanding of the various components of the project, to discuss ways of minimizing any negative impacts to the shoreline, and to determine how to best ensure public safety while restoration activities are occurring.
- 3) The sand taken from the open beach shall be placed in the restoration area in strict accordance with the Horning plans. Once sand placement and contouring has been accomplished, OPRD will require certification from Mr. Horning that the project (in terms of sand placement) has been implemented in accordance with his recommendations in the approved restoration plan.
- 4) Planting and fertilization of beach grass shall be done immediately after the sand placement has been accomplished and Mr. Horning has certified its consistency with his recommendations.

- 5) Beach grass monitoring reports shall be provided by Mr. Morgan at 6-month intervals beginning in July 2020 through January 2022, which identify any areas where additional plantings or other treatments are needed. It will be the responsibility of Windward Condominiums to follow the recommendations in the monitoring reports, and to ensure that the plantings survive and serve to effectively cover and stabilize the restoration area.
- 6) If grass coverage fails to meet or exceed 70% coverage over the restoration area within 2 years of planting, OPRD reserves the right to require additional treatment necessary to achieve beach grass coverage of 70%.

At this point, I ask that you provide me with your tentative plans to proceed, including your preferred schedule. It would be helpful if you can give me some idea of your preferred pre-implementation meeting date at the site, so I can schedule the time on my calendar in advance. And as always, feel free to call or email me with any questions or comments as we move forward. Again, I appreciate your cooperation in resolving the matter and I look forward to seeing the project when completed.

Jay Sennewald

2020 Census Update - Time to Start Spreading the Word!

1 message

Marc R Czornij (CENSUS/LA FED) <marc.r.czornij@2020census.gov>

Fri, Dec 20, 2019 at 3:25 PM

Good afternoon, everyone;

Thanks to all of you that have given your time, attention, and energy to efforts this year as we have worked to build partnerships and educate stakeholders across the state about the importance of next year's decennial Census. With the Census self-response opening up on March 12 - under three months from now - it means it's time to start spreading awareness in your communities to ensure folks understand that the Census is safe, important, and easy to complete.

The Census Bureau's nationwide awareness campaign begins next month, and we encourage you to start pushing messaging out into your communities if you haven't already. There are a number of quick, low-cost ways to approach this:

- > Include logos and messages in newsletters, e-newsletters, email updates, and social media posts
- > Print and hang flyers on community boards and other high-visibility locations
- > Insert messaging into utility bills
- > Link to 2020census.gov from your organization's homepage
- > Reserve space for messaging on digital reader boards and other high-visibility locations in your community as we get closer to March 12

Resources for all of the above can be found at our online hub for partners by clicking on the *Outreach Materials* link on the lefthand side of 2020census.gov/partners. Now is the time to start using these!

Keep in mind that Census data help guide billions of dollars worth of federal funding in Oregon for programs such as Supplemental Nutrition Assistance Program (SNAP), the National School Lunch Program, Head Start, Medicaid, Temporary Assistance for Need Families (TANF), Cooperative Extension Service, Highway Planning and Construction, and many, many others.

Additionally, Census data are used to plan for the location of hospitals, nursing homes, and clinics; create maps to speed emergency services to households; develop adult education programs; design public safety strategies, forecast housing and transportation needs; and much, much more.

With your help, I know we can deliver a complete and accurate 2020 Census that will benefit our communities across Oregon. Please don't hesitate to reach out to me with any questions and, if you have a moment, share with me what you're doing to spread awareness in your community!

Note that we are continuing to hire lots and lots of people across Oregon to be Census Takers, and our next round of hiring begins in January. Please encourage folks to apply at 2020census.gov/jobs, and feel free to share recruitment materials from 2020census.gov/partners. In fact, several counties in Oregon recently saw increased starting wages for Census Takers!

And it's not too late to form a Complete Count Committee or get connected to one in your area. Learn more here or by following up with me.

Thank you again for your support!

Sincerely,

Marc Czornij
