

## Staff Report

For City Council Meeting - 9/6/2023

### **Subject - New Business - Police Department - Request for Funds**

**Synopsis:** Chief Gregory is requesting reserve funds up to \$18,0000 to upfit all three of the department's police vehicles. He has provided the following information along with the attached bids:

*There are several items missing from our patrol vehicles that are traditionally added during original production and purchase. They are as follows:*

**Front A-pillar spotlight:** *A spotlight that sits on the A-pillar of a patrol vehicle – the upper-left pillar near the driver's left arm while they steer- allows the officer to move a high beam light in multiple directions. The light provides an officer with a tool to focus a beam into a vehicle on a traffic stop at night, offering a better view into the vehicle for their safety. It also gives an officer the ability to scan a certain area while driving to check for suspicious activity during a call for service. This is a standard and essential tool for police, and it is imperative an officer have one during nighttime patrols.*

**In-cab overhead LED dome light:** *The most beneficial reason for a red interior light is it allows the officer to read documents under low-light condition while in the cab of their vehicle. "The main benefit of using red lights instead of white or blue lights is that red light will not impact an officer's night vision as much as other colors. This is really important for emergency responders because they will need to go from inactive to active in a split second," Extreme Tactical Dynamics, (2019),*

*<https://www.extremetacticaldynamics.com/blog/why-do-cops-use-red-interior-lights/>. Officers do not always have time for their eyes to adjust to dark conditions, so having a red dome light makes a quicker transition. Having this light provides our officers with better officer safety. Second, by using a red-light feature, this light provides the officer with the ability to review documents in the cab of the patrol vehicle without bright lighting themselves, which more exposes them to a person looking in from the outside who may have nefarious intentions.*

**Overhead emergency lightbar:** *The most important benefit for having overhead emergency lighting on a patrol vehicle is visibility. "The primary purpose of a police vehicle's lighting is to inform drivers of law enforcement's presence. Police vehicles should be conspicuous to the traffic ahead, as when pulling a citizen over, as well as the traffic behind, in order to alert other drivers to slow down and approach with caution," Evaluation of traffic behavior in response to alternative police lighting, (2020),*

<https://www.sciencedirect.com/science/article/abs/pii/S0001457519318561>. I can speak from personal experience from the two months I have been with Gearhart PD. I have responded to multiple calls for service while running lights and sirens. Given that the highest emergency lights on all our police vehicles are located on the bottom of the side view mirrors – and intended to alert from the side – motorists often do not see us coming up behind them. This results in the operators failing to yield to the right of an emergency vehicle and puts us in an unsafe position resulting in straddling halfway in the lane and sounding our emergency horn to get their attention. Once they see us, the motorists will then pull to the right, and we move up to face the same issue with another vehicle. This is unsafe and puts our officers at a disadvantage. I believe having overhead light bars will better alert traffic we are behind them, which in turn should move to the right and allow us to continue. It also helps with other motorists seeing us, moving over and slowing down as they approach us during a traffic stop or the like. These lights are also equipped with alley and takedown lights, which provide more lighting for our officers to create an advantage.

**MPH Python Dual KA Band Radar:** *One of the most important concerns I was presented with, from the City Hall meet-and-greet, my interview panels, and shared with me by community members since becoming Chief, has been traffic enforcement. Out the gate, I started running traffic on the highway and throughout town. It didn't take long to see our biggest disadvantage to traffic speed enforcement, being our outdated and underequipped radars. I did not find exactly when our current radars were purchased, however, I was advised by Sgt. Brown they have been in operation for at least 13 years – since he has been here. Age of the units to the side, they are also front facing only. This results in officers having to sit in less than advantageous positions to run radar properly on moving vehicles. It also requires us to face opposing traffic while running vehicles, resulting in us having to pull forward, then into oncoming traffic to initiate a stop. Not the safest practice during the busy Highway 101 traffic periods when traffic enforcement is most needed. Being one who understands age doesn't always equate to less functional, I tried to get creative and find antennas to add rear radars to our units. Having rear radar allows an officer to sit alongside traffic and run vehicles as they approach from the rear, giving the officer the opportunity to safely pull into the flow of traffic, not against and then into. I quickly learned from our vendors that our current radars are not supported for parts anymore, due to their age. We are unable to purchase antennas for our units. Having up-to-date radars will allow us to gage speeding more efficiently, and my expectation is for Gearhart Officers to run more traffic and promote speed compliance through our community.*

*In conclusion, these requested items are not superficial in nature, they are essential tools that promote officer safety. I am also aware the cost will set the police vehicle budget line item back around a year. Our police vehicles are in good shape, so adding a year on the back end before*

*our next purchase should be a goal that is achievable.*

*Thank you for your consideration.*

*The proposed vendor will be Day Wireless Systems.*

**Recommended Motion:** Staff recommends Council motion to approve the Chief's request for reserve funds up to \$18,000 to upfit the department's vehicles with the proposed vendor.

**Legal Analysis:** The Chief follows Oregon purchasing laws. Multiple bids were collected and are attached. He is also in attendance to answer questions.

**Financial Analysis:** There is currently \$44,033.98 in the Police Car Reserve Fund.

Respectfully Submitted,

A handwritten signature in black ink, appearing to be 'CS' with a large flourish underneath.

Chad Sweet
