

CITY OF GEARHART

Staff Report

For City Council Meeting - 11/6/2024

Subject - Ordinances/Resolutions - Ordinance #942 Section 6.070(8) Preservation & Removal of Trees GZO Text Amendments

Synopsis: The Council had two worksession discussions in October on the proposed tree ordinance. The attached ordinance draft reflects requested changes from the version reviewed at the October Council meeting. No new public comments on the matter have been received; all previously received public comments are attached. City Planner Garrett Phillips has provided an updated Staff Report embedded below.

Staff Report

To: Gearhart City Council

From: Garrett Phillips, AICP City Planner

City File: ***Ordinance #942 Section 6.070(8) Preservation & Removal of Trees GZO Text Amendments***

Attachments: Ordinance with Proposed Amendments
Public Comments

Summary and Background Information

City of Gearhart's Planning Commission and City Council drafted amendments to 6.070(8) Preservation & Removal of Trees. The Staff Report for the September 4th, 2024 City Council Hearing summarizes the history of public meetings and edits to the draft amendments up until the September 4th, 2024 Hearing. City Council directed staff to edit the draft ordinance in the City Council meetings on September 4th, October 4th, October 15th (Work Session), and October 29th (Work Session). These changes are reflected in the attached Draft Ordinance 942, and are summarized below.

Section 6.070(8)	Change from 9/4/24 Draft.
B Definitions	<p>Moved invasive tree exemption to Section C. Applicability.</p> <p>Defines “55 inch Tree” “Heritage Tree” and their root zones.</p>
C Applicability	<p>Exempts three individual species and those listed on the state noxious weeds list.</p> <p>Adds reference to more restrictive tree removal protections in other parts of the Zoning Ordinance for the Freshwater Lake and Overlay Zone and in riparian buffers.</p>
D Requirements	<p>Lowers the threshold triggering a major tree removal permit, to removal of more than three trees in twelve months, or removal of a Heritage Tree or 55 Inch Tree.</p>
	<p>Establishes several exemptions from the major tree removal permit, instead requiring a minor tree removal permit.</p>
	<p>A major tree removal permit is not required in situations where removal is needed to comply with Airport Hazard Overlay height requirements. But a minor tree removal permit is required.</p>
	<p>A major tree removal permit is not required in situations where removal is needed to avoid damage to a septic system, but a minor tree removal permit is required.</p>
	<p>A major tree removal permit is not required in situations where removal is needed to make way for constructing improvements, but a minor tree removal permit is required.</p>
	<p>Establishes emergency situations where a minor permit may be obtained after tree removal, instead of before tree removal.</p>
	<p>When replacement trees are required as a condition of approval of a major tree removal permit, replacement tree size and planting timing standards are specified.</p>
	<p>Clarifies that a major tree removal permit requires public notice and a hearing.</p>
E Major Tree Removal Permit	<p>Changes the qualified professional who may provide evidence of tree disease from a “forester or arborist” to a “tree care specialist.”</p>

Criteria	
F Exceptions	<p>The F Exceptions Section was moved to Section D Requirements.</p> <p>Hazard and dangerous situations and emergency septic system repair language was moved to Section D requirements. When there is a safety hazard or dangerous condition, an arborist or tree care specialist is not required to review or document the situation, however a minor tree removal permit is required.</p>
F Heritage Tree Designation	Establishes criteria for designation of Heritage Trees based on their size, condition, and historical value.
G Trees in the ROW	Establishes that a permit is required to remove trees in the ROW, and comments on maintenance rights and responsibilities.

FINDINGS

I. Applicable Amendment Review Criteria and Procedures

GZO Section 6.070(8) Preservation and Removal of Trees

GZO Article 11 Amendments

GZO Article 13 Administrative & Procedural Provisions

Gearhart Comprehensive Plan

II. Testimony in response to versions up to September 4th

Testimony has been submitted over the course of several meetings and versions of the draft amendments. Generally this fell into the three categories listed below.

- Opposition to additional regulations that require property owners to spend more time and money to remove trees.
- Support for tree removal regulations
- Comments on technical aspects of the ordinance, such as the list of exempt invasive species.

III. Gearhart Zoning Ordinance and Comprehensive Plan Findings

GZO Section 11.010 to 11.030 and Comprehensive Plan Goals 1 and 2 Policies

GZO Section 11.010 to 11.030 and related Comprehensive Plan policies on citizen participation provide the authority and procedure for zoning ordinance amendments. Proposed amendments may be initiated by the Planning Commission, the City Council, or a property owner. After public notice has been provided the amendments shall be reviewed in accordance with the procedures of GZO Article 11 Amendment Criteria and Article 13 Administrative Provisions. Comprehensive Plan Goals 1 and 2 are intended to assure citizen involvement is provided in the amendment process and that amendments are consistent with the comprehensive plan. The requires an advertised public hearing with a recommendation by the Planning Commission and a decision by the City Council based on: findings that there is a public need for the amendments and that the amendments are in compliance with the Gearhart Comprehensive Plan.

Findings: Planning Commission initiated the amendments, public hearing notices were published October 21st, 2023, advertising the Planning Commission hearing. City Council considered the proposed amendments in January 2024 and requested Planning Commission to reconsider some aspects of the amendments. Planning Commission reconsidered the amendments in a March 2024 public meeting, and recommended amendments that were considered by the City Council in this August 2024 hearing. An additional City Council Hearing was held September 4th, 2024.

GZO Section 11.040 Amendment Criteria

Before an amendment to the text of the Zoning Ordinance is approved, findings will be made that it is consistent with the policies of the Comprehensive Plan and there is a public need for the proposed amendment.

Finding: A finding related to the Comprehensive Plan is provided later in this report. There is a public need for the amendment because of the following reasons:

- 1) Mature trees are valued by the public and serve many public purposes including but not limited to the following: providing benefits related to public health, aesthetic appearance, noise reduction, reducing stormwater discharges, removing air pollution, removing carbon from the atmosphere, reducing extreme summer temperatures. Therefore, the public and City have an interest in monitoring and managing trees.
- 2) Staff and planning commissioners report that they regularly are asked by residents to investigate tree removal activity and to identify whether violations of the tree removal requirements are occurring, A permit for tree removals will ensure that the City has early knowledge about allowed tree removals.
- 3) The Gearhart Zoning Ordinance tree removal standards protect some trees that are considered invasive. The proposed amendments remove protections for these trees.
- 4) The Gearhart Zoning Ordinance tree removal standards require City approval before correcting a hazard tree situation. The proposed amendments allow property owners to correct hazard tree situations without the City causing delay.

5) The Gearhart Zoning Ordinance tree removal standards are ambiguous about how multi-trunk trees are to be measured for the purpose of determining their treatment under the ordinance. The proposed amendments clarify how to measure trees in this situation.

Comprehensive Plan Review Criteria and Findings

(I) Citizen Involvement. Revision, Implementation and Process Goals (LCDC Goal I & 2)

Finding: See findings above.

(II) Open Space, Scenic Areas, Historic And Natural Resources (LCDC Goal 5)

The purpose of Plan Goal 5 is to conserve, preserve, and protect open space, scenic areas, historic and natural resources in and around the Gearhart community for future generations. The comprehensive plan references trees in two Goal 5 element policies, and they are quoted here for reference.

“The City will protect identified fresh- water wetlands from conflicting uses and activities, such as filling, drainage and tree removal through the application of a Freshwater Wetland Zone designation.”

"The harvesting of trees for commercial purposes shall be prohibited. In other circumstances, trees may be removed subject to the appropriate standards in the Zoning Ordinance."

Finding: Tree removal in significant wetlands and their buffers is regulated by other provisions of the Gearhart Zoning Ordinance outside of Section 6.070(8). The proposed amendments do not conflict with this element of the comprehensive plan.

(III) Coastal Shorelands LCDC Goal 17

Gearhart’s Coastal Shorelands policies include the following related to tree removal:

“The City will implement a program to maintain a 50-foot riparian zone on either side of Neacoxie Creek, Mill Creek and the Necanicum Estuary.”

“Protect and enhance existing dune features and coastal vegetation to promote natural buffers and reduce erosion.”

Finding: Tree removal in riparian zones is regulated by other provisions of the Gearhart Zoning Ordinance outside of Section 6.070(8). The proposed amendments do not conflict with this element of the comprehensive plan.

(IV) Beaches and Dunes LCDC Goal 18

Gearhart’s Beaches and Dunes policies include the following related to tree removal:

“Vegetation removal, in dune areas, shall be kept to the minimum required for the placement of structures. Structures shall be designed as much as possible to minimize the removal of existing vegetation.”

“Protect and enhance existing dune features and coastal vegetation to promote natural buffers and reduce erosion”

Finding: Tree removal in beach and dune areas is regulated by other provisions of the Gearhart Zoning Ordinance outside of Section 6.070(8). The proposed amendments do not conflict with this element of the comprehensive plan.

(V) Other Comprehensive Plan policies

Staff reviewed the Comprehensive Plan, including all sections listed below and found no other policies related to tree removal. Therefore the proposed amendments are consistent with the policies of the comprehensive plan.

- General Development Goals
- Air, Water, And Land Resource Quality (Goal 6)
- Geology And Geologic Hazards (Goal 7)
- Flood Hazards (Goal 7)
- Economy & Energy (Goals 9 & 13)
- Housing (Goal 10)
- Public Facilities And Services (Goal 11)
- Transportation (Goal 12)
- Urban Growth (Goal 14)
- Necanicum Estuary (Goals 16 & 17)
- Coastal Shorelands (Goal 17)
- Beaches And Dunes (Goal 18)
- Ocean Resources (Goal 19)

IV. Decision Options

A. Motion to approve Ordinance #942 based on the findings in the staff report or on alternate findings.

(Based on the Planning Commission recommendation and findings summarized in the staff report I move to approve Ordinance 942 amending the Gearhart Zoning Ordinance.)

B. Motion recommending denial of the proposed amendments based on alternate findings.

Council Options:

See **Decision Options** above.

Recommended Motion: Staff needs direction from Council; this is a Council decision.

“Based on the Planning Commission recommendation and findings summarized in the staff report I move to approve Ordinance 942 amending the Gearhart Zoning Ordinance.”

Legal Analysis: If approved as is, or “as amended” with minor changes, the ordinance would return in December for a second reading, taking effect 30-days later if approved.

Financial Analysis: The ordinance as written implements a permit process similar to the Beaches & Dunes area permit. The Commission’s original intention was not to focus on amending restrictions. Councilor Kloepper’s recommended changes do involve restrictions.

Respectfully Submitted,

A handwritten signature in black ink, appearing to be the name 'Chad', written in a cursive style.

Chad

CITY OF
GEARHART

ORDINANCE NO. 942

AN ORDINANCE AMENDING THE CITY OF GEARHART ZONING ORDINANCE SECTION 6.070(8) PRESERVATION & REMOVAL OF TREES

WHEREAS, the City of Gearhart wants to clarify the measurement of trees needing a permit to be removed; and

WHEREAS, the City of Gearhart wants to protect the ecological, public health, aesthetic, and historical values provided by trees; and

WHEREAS, the City of Gearhart wants avoid causing property owners to delay correcting hazard and dangerous tree situations; and

WHEREAS, the City wants to collect more data on the number of trees being cut.

NOW, THEREFORE, the City of Gearhart ordains the Zoning Ordinance to read as follows:

Amendments

8. PRESERVATION AND REMOVAL OF TREES

A Purpose:

The purpose of this section is to recognize that trees are a significant aesthetic and environmental resource within the City of Gearhart and to create conditions favorable to the preservation of this plant heritage for the benefit of the current and future residents of the City. The purpose is not to prohibit the removal of all trees, but to ensure that mature trees are removed only where necessary, and to permit the reasonable development and use of property.

B Definitions:

Tree: For the purpose of this section, “tree” is defined as follows: Any tree with a primary trunk greater than thirty-eight (38)-inches in circumference as measured four and one half (4-1/2) feet above the existing grade.

Fifty-Five Inch Tree: Any tree with a primary trunk greater than fifty-five (55)-inches in circumference as measured four and one half (4-1/2) feet above the existing grade.

Heritage Tree: A tree identified by the City Council as a Heritage Tree.

Heritage Tree and 55 Inch Tree Root Zone: The root zone is equal to the diameter of the trunk at 4.5 feet above the ground times 12 inches in any direction from the trunk. For example, a Heritage Tree with 55 inch circumference and 17.5 inch diameter has a root zone extending 210 inches (17.5 feet) in all directions from the trunk.

C Applicability:

1. This section does not apply to tree removal in the B.A.D. Overlay Zone, Freshwater Lake and Wetland Zone, and Goal 5 and Goal 17 riparian buffer areas, where the preservation and removal of trees are regulated by other applicable sections of the Gearhart Zoning Ordinance.
2. This section does not apply to the removal of trees listed on the State of Oregon Department of Agriculture noxious weeds list, and does not apply to the removal of English Holly, Cherry Laurel, and Siberian Elm.

D Requirements:

1. Any person proposing to remove, cut down, or otherwise destroy a tree shall first obtain a minor or major tree removal permit from the City.
2. One or more minor tree removal permits may be granted for
 - a. the removal of up to three total trees within any twelve month period; or
 - b. the removal of an unlimited number of trees, 55 inch trees and heritage trees in the following situations:
 - i. In order to construct proposed improvements, including the placement of structures and on-site sewerage disposal facilities, replacement sewerage disposal facilities, access ways, utilities, and essential grade changes authorized by a City Building Permit or County Septic Permit.
 - ii. The tree(s) pose a safety hazard, dangerous condition, or obstacle to an emergency septic system repair. In this case, the permit is not required prior to tree removal. The owner shall apply for a permit within ten days of the removal.
 - iii. The tree(s) threaten the integrity of a septic system, or tree removal is needed to repair or maintain a septic system.
 - iv. The tree height is within 20 feet of the maximum tree height limits of an applicable Airport Hazard Overlay Zone.
3. Upon submittal of a complete application and verification by City staff that the proposed tree removal meets the criteria for a minor tree removal permit, the permit shall be issued.
4. Removal of more than three trees within any twelve month period, or removal or impact to the root zone of one or more Heritage Trees or 55 Inch Trees may be permitted as a major tree removal permit. The Planning Commission may grant or deny a request for a major tree removal permit on the basis of the criteria set forth below in Section 6.070(8)(E), after conducting public notice and a hearing consistent with Article 13.

5. Such conditions as are deemed necessary and appropriate to ensure the proper enforcement of this section may be made part of the major removal permit. Such conditions may involve, but are not limited to the following:
 - a. The replacement of the trees proposed for removal with trees of a suitable type, size and location. Replacement trees must measure at minimum 5 feet tall for evergreen trees and 10 gallon size for deciduous trees.
 - b. A Plan for protecting trees on the project site during and after development.
 - c. Restrictions on cuts, fills and grading within the vicinity of remaining trees.
6. Tree removal that is to be undertaken in conjunction with a specific development project shall occur only after a building permit has been issued, or the Planning Commission or City Council has approved an activity requiring the removal of the trees.
7. An approved tree removal permit shall be void after one year from its issuance unless a shorter period was specified as a condition for approval.

E Major Tree Removal Permit Criteria: The granting of a major tree removal permit shall be based on a finding that at least one of the following criteria is met:

1. Necessity to remove trees which poses a safety hazard.
2. Necessity to remove trees which are diseased. Evidence of disease may be provided by a qualified tree care specialist who will not be involved in their removal.
3. Solar access; and the need to remove trees which deposit needles or other debris on rooftops. The burden of proof is on the applicant to show that other design alternatives which do not require the tree removal are not practical or will create a significant economic hardship.

F Heritage Tree Designation:

1. Heritage trees shall be those trees designated by the City Council following review of a nomination form submitted by a citizen and accepted, in writing, by the property owner. If a proposed Heritage Tree is on private property, the property owner must give written consent to the Heritage Tree Application before such application can proceed.
2. The following criteria shall be used:
 - a. Minimum circumference at four and one half feet above ground = point value 5
 - i. Rapid growing (Douglas Fir, Giant Sequoia, etc.) – 138"
 - ii. Moderate growing (Oregon White Oak, Scarlet Oak) – 107"
 - iii. Slow and smaller growing (Ginkgo, Madrone) – 86"
 - b. Location factor point values:

- 6 Commercial areas
- 5 Yard adjacent to street
- 4 Side yard
- 3 Wooded lot within subdivision
- 1 Forested area

c. Condition factor point values:

- 5 Excellent – perfect form, little or no dead wood, all limbs have good attachments, no sign of decay
- 4 Very good – good form, multi-leaders, but with good attachments, 10% or less large dead wood
- 2 Good – unbalanced or incomplete crown, tight limb angles, 15% – 20% larger dead wood
- 1 Poor – evidence of some decay, 20% – 30% larger dead wood, history of being topped
- 0 Very poor – structurally unsound, extensive decay, dieback, poor form, unbalanced or greatly reduced crown.

d. Historical factor is determined by the tree’s relative historic significance. Historic significance may be determined by the tree’s association with historic or famous events, the cultural history of the nation, State, community or person or persons who have significantly contributed to the history of the nation, state or community. Local historians may be called upon for research assistance for this category. Point values:

- 5 Very significant
- 4 Significant
- 3 Somewhat significant
- 2 Marginally significant
- 1 Not significant

e. Formula: size x location x condition x historical factor = heritage tree points

f. Trees shall accumulate a minimum off 180 points to receive consideration as a heritage tree.

g. Upon a tree being designated as a Heritage Tree, a plaque so designating may be placed upon or near said tree. A Heritage Tree may not be removed without a public hearing and approved major tree removal permit at least 30 days prior to the proposed date of removal.

G Trees in Rights of Way.

1. Trees located within the public right-of-way are not routinely maintained by the City of Gearhart. Maintenance or removal may be initiated by either the property owner or the City, depending on the situation.
2. Adjacent property owners may request a permit for removing trees through the minor or major tree removal permit process.

H Appeals of a decision of the City Administrator or Planning Commission shall be in accordance with Section 13.060.

I Enforcement. Enforcement of this section shall be in accordance with Article 15 of this ordinance, or by other ordinances the City Council may adopt to implement the purpose of this section.

Passed by the City Council of Gearhart this _____ day of _____, 2024.

Yeas: _____

Nays: _____

Absent: _____

Abstain: _____

Approved and signed by the Mayor of Gearhart this _____ day of _____, 2024.

Subject: tree ordinance

Dear Dana,

I did not comment in public about certain things in the tree ordinance. I mentioned to friends about how I did not like having to hire a tree arborist. Councilor Sharon demanded to know why I did not fully support it.

This is my take on that issue. Recently Bayview Transit Mix cut four very old and ivy-damaged trees along the railroad-right-of-way. I had been bugging them for several years about it. After the black aphid infestation a few years ago, none of them recovered totally.

I measured one tree that had a 32" diameter (100" circumference)It was rotted in the center. The only way for a tree arborist to determine the rot would be to take a core sample. Then he could certify the work. From using information from a forestry website, I was able to calculate the tree's age-160 years.

The trees along Neacoxie Creek were measured by Shannon Smith and neighbors. One tree was 132" circumference. By my calculation, 210 years old or more.

I told Sharon my thoughts about the heritage trees 50 years old. At the Sons of Norway ballfield, along the highway, those trees were planted in 1981, x-mas tree size. I could not call those "heritage" trees.

The tree arborists really don't like the ordinance. These trees in Gearhart are really old. It is a crap shoot deciding whether a tree should remain.

These are my thoughts on this matter.

September 23, 2024

Dear Mayor Smith & Gearhart City Councilors,

I own Mancill Lawn & Yard Maintenance in Seaside & service many Gearhart properties. I have been following the proposed tree ordinance and feel I need to comment. I have some serious concerns with the proposed amendments that Council Kloepfer has suggested.

My first concern is her proposed requirement that a replacement tree be 3" in diameter, measured 4 1/2' from the ground. That is ABSURD! Do any of you have any idea how big that tree would be to measure that diameter at that height? It's a massive tree to try to source, transport, & plant. No one local carries any tree that big including Dennis 7 Dees, Home Depot & Brims. It is such a big tree that no one would be able to load & unload into a vehicle, move by hand, then try to plant. In the Portland area there is a company in Hillsboro called Big Trees that sells them. They come out with a big Bobcat type machine with equipment called a tree spade to plant that tree. Those trees cost many thousands of dollars and then you have to pay for the equipment to plant it. An easy reference for tree comparison is the average 6-7' Christmas tree (Noble or Douglas Fir). A 6' Christmas tree is 7-8 years old. The very base of it might be 3-4" diameter but 4.5' up it's only 1.5-2". I've actually been looking at all my recently landscaped yards I maintain. Many people commonly plant cypress, cedar, spruce or deciduous trees like Maple, birch, flowering cherry, or even fruit producing trees. The largest trees I've seen installed in landscaping are cypress that are 6-8' tall. None are even close to 3" diameter chest level. Even ones that have been in a few years that are 12-15' high don't appear to be 3" in diameter 4.5' up. Another issue with large trees grown for transplant is that the root system will be rootbound in the pot so when the tree is planted the roots will not establish well and the tree will be weakened. Faster growing species of trees that attain this size in less time typically are brittle trees. With all the windstorms here those trees would be knocked down or broken off. This proposal would be an unreasonable, very expensive burden on Gearhart residents. For lack of a better word it is utterly STUPID!

The next concern is the requirement that a tree care professional diagnose the tree but CANNOT be involved in its removal. I'm not sure how you expect people to come look at a job they know they won't get. There are only has a few tree services & all are booked up all the time. For someone to come just look at a tree they'll have to charge a big fee to make up for not getting the job. I speculate most won't bother to even waste their time. If someone called me & I knew I wasn't going to get the job I wouldn't waste my time or fuel driving around for it. This is another ABSURD & RIDICULOUS proposal.

What this tree ordinance SHOULD address in more detail is trees, and specifically invasive or water loving trees, planted on or near septic systems. Since Gearhart is entirely on septic tree root invasion into septic pipes is a huge concern. I see alot working all over Gearhart. I've seen people plant birch trees right on top of a drainfield. Huge no-no. My parents are dealing with a neighbor that planted a weeping willow near

their drainfield that sends roots & runners into the drain pipes. Eventually these septic systems will fail due to careless tree planting. This type of stuff is too important to not address.

My understanding is that some of this started with Council Kloepfer being upset about her neighbor removing some trees. She appears to be taking her anger out by imposing ridiculous requirements on every resident & property owner in Gearhart. It seems as if some people are trying turn Gearhart into a big HOA with a bunch of crazy rules. There is already one ridiculous HOA at the Reserve. We don't need the City of Gearhart to act like one as well.

Gearhart tree preservation

Molly Meyer <mjmeyer99@gmail.com>
To: Krysti@cityofgearhart.com

Sat, Aug 31, 2024 at 9:33 AM

Kristi, please post this as public comment for the hearing on Wednesday.
Thank you, Molly Meyer

I am in favor of tree preservation in Gearhart. Living trees benefit everyone including past, present, and future generations, but once they are cut down, they benefit only a few. Our trees in Gearhart provide green space, block the wind, cool the air temperature, and much much more. I feel it is important for us to protect every tree we have for the future generations of Gearhart.

Sun, Sep 1, 2024 at 10:28 AM

Hello,

I am in favor of the Preservation and Removal of Trees amendment and encourage the city council to approve. Saving as many trees as possible for their beauty, carbon sequestration, cooling and habitat for eagles, osprey, owls and other frequent flyers is a necessity for a healthy environment.

Thank you to everyone who has worked on this amendment.

Deanna Mancill <dmancill@msn.com>

Mon, Aug 26, 2024 at 4:40 PM

To: "councilorsharon@cityofgearhart.com" <councilorsharon@cityofgearhart.com>, "councilorgould@cityofgearhart.com" <councilorgould@cityofgearhart.com>, "chadsweet@cityofgearhart.com" <chadsweet@cityofgearhart.com>, "councilorfackerell@cityofgearhart.com" <councilorfackerell@cityofgearhart.com>, "mayorsmith@cityofgearhart.com" <mayorsmith@cityofgearhart.com>, "councilordevereaux@cityofgearhart.com" <councilordevereaux@cityofgearhart.com>

Gearhart city council and Chad Sweet:

I believe the tree ordinance omitted trees that should not be in the "protected" status. The ordinance, as written, excludes common Hawthornè, cherry laurel, tree of heaven, and holly. This is not a complete list of the invasive trees that are a problem.

My information comes from the "Invasive Plant Atlas of the United States" the University of Georgia Center for Invasive Species and Ecosystem Health and the National Park Service.

Invasive species are non-native plants that compete with native plants, crowding out the native plants. Siberian Elm along Neacoxie Creek was planted by the Civilian Conservation Corps in the 1930's as part of a restoration project. Many states planted Siberian elm in the 1930's, and all of them regret the decision. Twenty-five states, including Oregon, consider it invasive, according to the USDA Forest Service.

The Siberian elms reproduce by seed, produced by the mother trees along Woodland Avenue and the Neacoxie Creek riverbank. It has won the award: Weed of the Week. Our 2004 restoration project done by the Neacoxie Creek Watershed Commission on Nora Taylor's land was only the start of addressing this issue.

I hope the tree ordinance, as written, does not prevent the Necanicum Watershed Council from continuing their restoration work along Neacoxie Creek. Let's not make it too complicated!

The Weeping Willow is the other plant that needs to be listed. The root system invades septic systems and utilities. Protecting that tree does not make any sense.

I propose an amendment to the ordinance:

The common Hawthorne, cherry laurel, tree of heaven, holly, Siberian Elm and Weeping Willow are not in the "protected status." This is not a complete list, and as situations warrant, further guidance should refer to the "Invasive Plant Atlas of the United States."

Please enter this letter into the public record. Thank you.

Preserving Our Living Legacy: A Stewardship Responsibility

In Gearhart stand trees that have witnessed centuries of history. Some hidden along the banks of the Neacoxie, others towering in the backyards of our homes. These ancient sentinels are not just trees; they are guardians of our natural heritage, embodying the essence of our landscape and a core part of what makes Gearhart home. As stewards of this land, we are entrusted with their protection.

Aldo Leopold wisely said, "We abuse land because we regard it as a commodity belonging to us. When we see land as a community to which we belong, we may begin to use it with love and respect." These trees are not resources to exploit, or obstacles to be overcome, but a community of life we must preserve. Any decision or regulation that does not respect the role of these talismans and our role to protect them endangers our connection to this land and jeopardizes a legacy that, once lost, can never be restored.

Terry Tempest Williams reminds us, "The eyes of the future are looking back at us and they are praying for us to see beyond our own time." Our responsibility is clear: we must protect these trees, not only for their ecological value but because it is our duty to future generations. In their silent majesty, they provide critical habitat, filter our air, and stabilize our environment in ways no man-made system can replicate.

Now, we must choose preservation over possible destruction, ensuring that progress and conservation coexist. But always err on the side of protection of the wilderness, and these legacy trees that formed the foundation of Gearhart Park. Let us honor our role as caretakers, safeguarding these ancient trees for those who will walk beneath their branches long after we are gone.

We ask you take some time. Walk the Ridge Path, stroll to the end of the streets that lead to the Neacoxie, and peer up at the treasure that represents the heart of this great town. We implore our community leaders and residents to stand together in protecting these natural treasures, ensuring that future generations can continue to experience the beauty and wisdom they offer.

Todd and Paula Miller

Hello,

Please find attached my letter regarding the trees ordinance. I've also pasted it below.

Thanks,
Daniel

--

To whom it may concern,

Gearhart claims to be proud of its "semi-rural" character, which is one reason I choose to live here. Our coastline is naturally forested, so rural here and elsewhere in Clatsop County suggests stands of mature trees. While Seaside presents an urban appearance, Gearhart still maintains a more wooded look, especially where I live, near Woodland Ave. But over the last few years I've watched Gearhart lose many tall trees, only a few of which were replanted.

I support any tightening of the city's rules to protect trees in Gearhart. It takes an hour to remove a 30-foot spruce or pine, but it takes decades to grow such a tree. If we don't protect them now, what will this town look like in ten years? (Like the industrial forestlands to our east?)

I worry about concessions for "solar access" and pine needles, which seem to allow for indiscriminate removal, considering how little sun we get, and how much visitors (non-full time residents) value sunshine while "at the beach." If someone in Gearhart wants more sunlight, shouldn't they find it instead in a sunny climate or in a geography naturally devoid of trees, e.g. Bend?

I'd like to suggest replanting requirements for tree removals. It will take decades for a 6-foot tree to become dangerous or block out the sun again. Meanwhile, that tree would provide habitat for birds and other animals and would enrich the soil. It would also maintain the desired "semi-rural" aesthetic Gearhart wishes to promote.

Beyond the removal of trees for danger or "solar access," I've noticed several wooded lots developed with little regard for the trees onsite, (e.g. North Marion, between 7th and 8th). I've also seen massive homes replace mature spruce forest (e.g. Ridge Path, between D and E). I see other lots currently for sale, and considering the size of homes being built in Gearhart today, I know many of the tall trees on those lots will soon fall to make room for another likely mostly-vacant second home. More protections here will be needed to keep a few wooded lots left in Gearhart, to the benefit of people, animals, and plants – our entire ecosystem.

Finally, I have to say that the review process for this was rather complicated. What exactly is the law, and what are the suggested changes? A simple document answering these two questions would save a lot of time and trouble, instead of links to a range of documents. This might also increase public involvement.

What's at risk if we continue to remove Gearhart's trees? From semi-rural to semi-urban. Maintaining semi-rural begins with protecting Gearhart's trees.

July 3rd, 2024

To the Gearhart Mayor, City Manager, Council members & Planning Committee members,

As a citizen of Gearhart, 33 year resident of Clatsop County, avid gardener and steward of green spaces, I would like to address the decision makers of Gearhart to mindfully consider the following:

- Creating better, more effective guidelines for stewardship of our riparian zone on the Necoxie creek and estuary. They are part of the Gearhart history and our heritage.
- Monitor and enforce the 50 ft. riparian zone and protect and care for ALL the trees along the Necoxie.
- Preserve the trees along the Ridge Path and continue to advocate for native plant species to thrive there.
- Address the knotweed and other invasive species along the Necoxie Creek and the Ridge path with an active plan to remove them.
- Encourage residents to plant native species and award Pollinator Friendly Garden status placards to those who participate.
- Make Gearhart a Pollinator Friendly City and discourage the use of harmful pesticides that can end up in our creeks and waterways.

We have a very unique community and ecosystem here in Gearhart. Something we should all take time to see the wonder in. SO many here take it for granted. But its future lies in your hands. This delicate balance of people and nature, that both should be one in the same. I look forward to seeing the progress you make in addressing these concerns and considerations.

Respectfully,

Angela Sidlo

Subject: Gearhart Zoning Ordinance Section 6.070, tree ordinance, public hearing

Dear Gearhart Planning Commission and Angoleana Torres:

I have reviewed the proposed changes to the tree ordinance and have noted glaring omissions to what we are trying to accomplish other than trying to protect private property rights.

I have been researching the Gearhart Comprehensive Plan from the 1980's, which references "Significant Shoreland and Wetland Habitats in the Clatsop Plains", 1983, Duncan Thomas report commissioned by Clatsop County. Neacoxie Creek has the Goal 17 Coastal Shorelands designations, and a 50' setback from Neacoxie Creek.

The Necanicum Estuary Inventory Plan was adopted in 1984 by the Board of County Commissioners with Seaside and Gearhart as partners. Anything the City of Gearhart approves within the Coastal Shoreland boundary affects the Necanicum Estuary and affects Seaside and Clatsop County. Not only does the Oregon Department of Fish and Wildlife need to be consulted, but Seaside and Clatsop County. Tree and vegetation removal within this boundary needs to be carefully reviewed and the ecological values need to be maintained.

In 2002, the City of Gearhart Planning Commission adopted the Neacoxie Watershed Stewardship Policy, with the assistance of Neal Maine, Phil and Deanna Mancill, Sarah Nebeker and Bill Berg. Our watershed

commission focused on education and restoration of Neacoxie Creek.

One item from the tree ordinance that was not addressed were the invasive trees in the city. In the 1930's, the Civilian Conservation Corps planted Chinese Elm trees along Neacoxie Creek as part of restoration and erosion control. They are not native and are very invasive! One mother tree sent hundreds of runners along the creek, including busting through a house foundation wall!

The Invasive Species list on the Gearhart zoning ordinance relies on information from the Oregon Department of Agriculture, which does not identify the trees that are a nuisance and are a threat to septic systems. Oregon State University extension service has elm, birch, poplar, and weeping willow among the offending trees. OSU recommends at least 25' or more for a setback from septic systems, including sewer pipe.

I had to sign an Oregon DEQ Easement Agreement that had covenants and restrictions that required me to not do anything detrimental to the entire septic system, like planting trees next to the sewer pipe or drainfield. I had two tax lots for the septic tank and drainfield. My neighbor had a similar agreement with the DEQ, but the Tax Assessor's office allowed them to combine the two lots into one. Somehow the County Health Department thought it invalidated the DEQ Easement Agreement.

The neighbor planted a weeping willow in 2010 on top of their sewer pipe. The tree is over thirty feet tall and the tree roots can extend over 90 feet. My sewer pipe is 25' feet away, well within my property line 10' setback.

The City of Gearhart building official refused to do anything about the safety and health hazard it presents to a functioning septic system. I was forced to get additional insurance on that sewer pipe, because regular Homeowners insurance doesn't cover this.

I do agree with the provision: (1) The City Administrator or designee may grant the immediate removal of trees which pose a safety hazard or dangerous condition, but add this to provision: public health hazard to septic systems.

My tax lot is very small and I used to have large birch trees and douglas fir trees on my property. There was no area in the yard that could safely accomodate large trees. The Great Coastal Gale of 2007 took all the trees down. Lucky they did not land on the house!

The trees that are really vital are the "heritage trees" along Neacoxie Creek. They are over 200 years old and within the Goal 17 Coastal Shorelands exception.

The ordinance obviously needs a great deal of work as currently written. In some ways, it is too restrictive and in other ways does not address the invasive trees within our city. It falls far short of what needs to be done.

Please enter this into the public record. Thank you.

Sincerely,

Deanna Mancill

Re: #23-05ZTA

Dear Gearhart City Council,

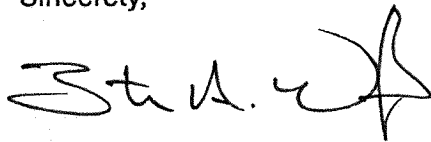

I have great concern for the provision about 'needles' and 'solar access' in the proposed zoning ordinance.

It is excessively vague. Could one neighbor require the trees on an adjacent site which are not 'danger trees' be cut so the house would shed no needles or be cut to accommodate solar access? Whom will determine the amount of 'needle mitigation' or 'solar access?'

It has been my experience that zone changes in Gearhart are usually more detrimental to the ownership rights of most homeowners. In the past, Sound and Vacation Rental Ordinances included carve out exceptions that benefit a few and are unfavorable to most homeowners in Gearhart.

I think a significant amount of specific detail is necessary in this ordinance or it should be tabled. It should not be left to be determined at the administrative level.

Sincerely,

Steven Weed

Dear Cameron,

Thank you for your email. I have received your testimony and successfully opened the attachment. However, please note that all correspondence was due by Friday, August 2nd. As a result, your testimony will be entered as late correspondence and posted after the hearing.

If you would like your testimony to be part of the hearing, you will need to be present at the hearing tomorrow and read it during the hearing. I have included Krysti in this email to ensure this is added to the late correspondence.

Thank you for your understanding.

Dear Angelina,

Thank you for the reply, and for opening the testimony and placing it in the record.

Please do note that under Oregon law, no testimony is 'late' **unless** provided after the record is closed. Cities and counties are perfectly able to express that they would prefer testimony by an early date before the hearing in order to place it in the packet or otherwise give decision-makers more time to read it. But all testimony submitted before and/or during the hearing is legitimately part of the record **and** is to be given to decision-makers.

This is not late testimony. It would only be late if I sought to provide it to you after the hearing once the record is closed. Such is not the case. Please distribute the testimony now to decision-makers, and post it to the website as testimony for this upcoming hearing.

Thank you,

Cameron

City of Gearhart Council meeting, 7 August 2024

Public hearing: preservation and removal of trees

Please read this at the public meeting (2 minutes long)

Robert Carson, 226 Ridge Drive, Gearhart

My wife Clare was raised in Clatsop County; we have been coming to Gearhart for more than ½ century. With its waters (wetlands, streams, and the ocean), dunes, and wildlife (especially birds), Gearhart is a special town. Trees provide carbon sequestration (to help combat Earth's greatest problem), habitat, beauty, and shade. Every tree is valuable, so it should be exceptional circumstances when one needs to be removed.

We must have the strongest possible tree preservation ordinance. No trees should be cut down in wetlands. Of significant importance are the old-growth Sitka spruce along the Ridge Path. (No building permits should be issued on land within reach of the next tsunami.) Trees should be part of required landscaping for new development.

The residents, homeowners, business owners, and public officials should be making the decisions about Gearhart trees. There should be no input from those with a conflict of interest, specifically businesses or individuals who receive payment for tree removal.

Indeed, if Gearhart has not already done so, the city should apply to the Arbor Day Foundation to be a Tree City USA. The total number of tree species in Gearhart is exceptionally large (list available upon request) thanks to planting by homeowners. Our native trees like lodgepole (shore) pine, western hemlock, Douglas fir, Sitka spruce, red alder (a nitrogen fixer), and bigleaf maple are magnificent.

I ardently support a strong ordinance regarding the preservation and removal of trees, and encouragement to plant more trees. Thank you.

Respectfully, Bob (3 August 2024)

After review of the proposed ordinance, my recommendation is that the city not proceed until we gather expert advice. I have personally reached out to four other contractors, two are tree specialists, certified arborist. I've been an arborists for over 22 years here in Clatsop county in business over 35 years. I do see some problems in this ordinance as it reads I'm going to recommend the city not pass, but allow us to input expert advice specifically in this field. I believe we could modify this ordinance to meet everyone's needs. Our goal is for contractors and tree arborists working together with city council members to formulate a simple plan for beautiful healthy Trees.

As a tree service owner I have been working in the city of gearhart for the past 20 years. Working for the city and for the home owners. I've been a part of construction clearing, view maintenance, planting new trees, mitigating fire fuel by removing and chipping trees to make for a safe environment. At no time have we ever been a part of over cutting. There is always a purpose in what we do. I believe that extremism in any form is a negative thing. There has to be balance. Having some control measures is fine. Drawing a hard and fast line is not. The reality is that no one has the time or resources to take something that is currently working and turn it into a very complicated and costly process. Home owners should be able to make there own decisions regarding their property including how and what they do with their trees. If you look at the greater gearhart area you will clearly see that people care about trees. We have been pruning hundreds of them over the years. The homes that all of you live in most likely were at one time a site that was changed from a natural area to a homesite. I would urge the community to keep the controls as they are. It's functional and it works.

Councilor Dana Gould
Mayor and Council Members
City of Gearhart, Oregon

Subject: Opposition to Proposed Tree Ordinance

I am writing to express my strong opposition to the proposed tree ordinance that is under consideration by the City of Gearhart. As a concerned citizen, who has grown up here, and been a property owner in Gearhart for almost fifty years, I believe this ordinance would have unintended consequences that would negatively impact our community.

Specifically, I am concerned about the potential costs associated, for the homeowner in complying with the ordinance, as well as the impact it would have on my property rights. Also not to mention the cost the city would incur. I understand the importance of trees in our community, but I believe there are effective and less intrusive ways to achieve the city's goals.

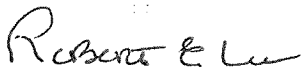

One only has to walk through this small community to see the pride and personalities of the homeowners, the care given to the houses, lawns, shrubs, flowers, and of course trees. Some trees need to come down, some age, some are rotten, are too close to the house, causing roof damage, or to get light in the house. Lots where new houses are to be built may need to cut a tree to place the building where the homeowner wants it.

Gearhart does not have a sewer system. Lots in Gearhart are small and the average cost of a septic system is \$20,000, trees will need to be cut back or taken down because roots invade the drain field.

I urge the city to consider keeping the tree ordinance as it is, and consider a solution that balances the needs of all property owners, not just a few, with the need to protect our urban forest. I would be happy to discuss this further with you and explore options that work for everyone in Gearhart.

Thank you for your time and consideration.

Respectfully,

Robert E. Lee
